

# Matveev Ivan

## PERSONAL DETAILS

<i>Birth</i>	Февраль, 1999
<i>Phone</i>	+7 (905) 160-46-29
<i>Mail</i>	matveev.id@phystech.edu
<i>Telegram</i>	t.me/ZwZ5v

## EDUCATION

### Bachelor's Degree

2017-2021

MIPT

Faculty of Problems of Physics and Energy (FPPE)  
Department of Space Physics  
Laboratory: IKI RAN  
Area of research: Astrophysics

### Master's Degree

2021-2023

MIPT

Phystech School of Applied Mathematics and Informatics (FPMI)  
Department of Technological Entrepreneurship.

## WORK AND PROJECT EXPERIENCE

### IOS-developer

Sum 2020

*Kuzmenkov, Part-time*

It took us three months to create the 4Tag game (card game set). I took care of the front end and wrote an algorithm to match the cards. The product went on the Japanese market in the summer of 2020.

### Analyst

2021-2022

*Yandex*

Created a telegram bot to automate internal processes. Created reports, tested hypotheses, and processed data. Analyzed the customer journey and solved product problems related to conversion.

### Developer-Analyst

2021-2022

*AdaptEd*

Analyzed instructional data, visualized it, and constructed and tested hypotheses related to student behavior. Developing rating and recommendation systems in Python

### Python Developer

2022-Now

*Alemira*

Creating the back part of the web service for educational organizations
